Thanks to you, our mission of teaching, research and service moves ever forward.
A California University Tries to Shield an Entire City From Coronavirus

The University of California, Davis, is providing free testing, masks and quarantine housing to tens of thousands of people who live nearby.
4th best public university in the nation
4th best college for your money
2nd best public university for social mobility
UC Davis faculty members go above and beyond expectations.

We set a new record for sponsored research funding: $941 million.
Smoke from wildfires adversely affects immune system, UC Davis study says

A novel UC Davis study with possible implications for human health has found that exposure to wildfire smoke makes young rhesus monkeys more vulnerable to disease.

The research, conducted by UC Davis and the California Air Resources Board, found that rhesus macaque monkeys born at the university’s Primate Research Center in the summer of 2008 – an unusually intense fire season – had depressed immune systems compared with those born a year later.

The study is timely given scientists’ predictions that climate change will increase the frequency and intensity of wildfires.
We’re recruiting for some key positions.
Dean Jennifer Curtis returns to Department of Chemical Engineering
School of Veterinary Medicine

Dean Michael Lairmore to step down in June
The Budget: Revenue

2020–21 Budgeted Revenue
$5.7 Billion

- Medical Center: 45%
- State Designated and Restricted: 1%
- Indirect Cost Recovery: 3%
- Grants and Contracts: 10%
- Federal Pell Grants: 1%
- Sales and Service, Auxiliary: 11%
- Gifts, Endowments, Interest, Other: 7%
- Tuition: 19% ($2.93 Billion)
- State Unrestricted and Tuition: 18% ($1.04 Billion)

2020–21 Budgeted Revenue Excluding Medical Center
$3.1 Billion

- State Unrestricted and Tuition: 33% ($1.04 Billion)
- Tuition: 20% ($619M)
- Grants and Contracts: 19%
- Sales and Service, Auxiliary: 21%
- Federal Pell Grants: 2%
- Gifts, Endowments, Interest, Other: 12%
- Student Fees: 7%
Pandemic Impacts:

$45 million reduction in State funding

$120 million Medical Center impacts

$210 million lost revenue and increased costs
Philanthropy is thriving at UC Davis.

The world has come to expect GREAT things from UC Davis.

Reversing the course of climate change

Our planet's future hinges on our ability to cut carbon pollution. At UC Davis, students and researchers are working to create the world’s most advanced carbon farm, with ways to capture more carbon dioxide from the air and store it securely in natural and engineered materials.

As a student-athlete, communications major and women’s soccer forward, fans can follow her lead. And if they can’t, they can follow her on social media. As one of the best players in the country, she is a role model for other women in sports.

Aggie-VO was designed to fully equip every student athlete in a changing professional landscape. It provides career guidance and professional development for life after graduation.

Aggie-VO was a key component of the new Aggie Scholars program. It is a program that supports and benefits the university by creating a better future for everyone.

As part of the One Climate initiative, which is taking decisive action on climate change, the university is committed to being a leader in sustainability and environmental responsibility.
We’re making progress on campus.
